Dear Examiners,

I have not received an allowance, your response or a phone call regarding this application. I left a message with Examiner Ly but it was not returned.

I am again forwarding you my e-mails and the authorization.

Please respond asap or call me at 562/597-7504.

Thanks,

Sandra Parker

According to another aspect of the pre-pass mechanism, an intermediate processing function may be inserted either during this pre-pass stage, or at a later processing stage, to provide additional, auxiliary processing capabilities. Instead of using the pointer to the function to call to process the operation specified by the OPCODE ~~is replaced by~~ in this aspect the OPCODE is augmented with a pointer to the intermediate processing function and an auxiliary data structure. The auxiliary data structure includes a pointer to store the pointer to the function to call to process the operation specified by the OPCODE. The intermediate function provides the capability to perform additional, auxiliary processing such as gathering statistics on the function which process the operation specified by the OPCODE, or requesting input from a user via the terminal interface 16, before or after calling the function to process the operation specified by the OPCODE. According to yet another aspect, instead of using the pointer to the function to call to process the operation specified by the OPCODE, the OPCODE is augmented with another pointer which points to the auxiliary data structure.

Subject: Fw: 09/628,599

Dear Supervisory Examiner Breene,

I just received a phone call from Examiner Corrielus who informed me that he is no longer involved with this case and that it is now under your supervision. Thus, I am forwarding you all these e-mails, originally sent two months ago when I was assured by the Examiners that this application would be allowed.

Time is of the essence here. Last Office Action, mailed on 7/31/06, although not marked in the Summary as Final, was proclaimed so by the Examiner Ly on its last page and in his subsequent e-mail. This application was under appeal when Examiner Ly continued prosecution instead of filing an Examiner's Brief. I objected to you and the Director by e-mails for which you requested a written authorization which was forwarded to Examiner Ly in August.

However, nothing was done since August despite reassurances that the application is allowable and that neither examiner Ly nor Corrielus had further objections or rejections.

Furthermore, this application was pulled out from PAIR and cannot be reviewed. Although I alerted numerous USPTO personnel, including yourself, it was not put back.

Please review this file asap and call me at 562/597-7504.

Best regards,
Sandra Parker
